

Corporate Social Engagement

JJUC's most important local community engagement is to provide a safe, sustainable and long-term business/work-environment. JJUC supports many families in various communities and believes that social engagement

in communities where we do business can help JJUC creating shared values between the company and society as a whole. JJUC continually renews and improves to integrate a true individual and collective approach to our common

future. Therefore JJUC is engaged in different social areas, and we are proud to be associated with the various support partners.

Our long-standing cooperation partner, the manning company Philippine Transmarine Carriers, Inc. (PTC) launched its first housing and community development project for its seafarers and their families in 2010. PTC wished to name one of the streets in the new residential area "The Uglan Street". The picture is taken after the naming ceremony.

The following are a few of the organizations JJUC proudly supports:

- ◇ Uglan Circle of Wives (UCW),
- ◇ MAPU-PTC
- ◇ SOS Children's Villages
- ◇ Local Engagement (Support)

JJUC's engagement is described under Social Performance.
